

AIR INSTALLATION AND AIRCRAFT STUDIES

Reference: BIAC-VISRA-001-01

Language: English

Duration: Five days

Preparatory training: Employed as Military Intelligence Analyst or Civilian equivalent.

Graduation Title: Imagery Analyst - Air Installations and Aircraft

AIM

Provide students sound knowledge in analysis of Air Installations and Aircraft.

Upon completion of the course the student should be able to analyze an Air Installation, including Aircraft and Ground Equipment, to the full extent.

COURSE CONTENT

Lectures will contain all necessary imagery to provide the possibilities for analysis of various Military and Civil Air Installations.

Also Aircraft (W.E.F.T system) and Associated Ground Equipment will be handled extensively.

Specific Aircraft Recognition, however, is provided in a separate five day course ([RECOGNITION TRAINING COURSE – AIR / BIAC-VISRA-001-01R](#)).

Hard-copy materials to support the training sessions will be provided.
