

ELECTRONIC INSTALLATION STUDIES

Reference: BIAC-VISRA-001-03

Language: English

Duration: Five days

Preparatory training: Employed as Military Intelligence Analyst or Civilian equivalent.

Graduation Title: Imagery Analyst - Electronic Installations

AIM

Provide students sound knowledge in analysis of Electronic Installations, its Function and Operations. Upon completion of the course the student should be able to analyze an Electronic Installation, including associated Ground Equipment, to the full extent.

COURSE CONTENT

Lectures will contain all necessary imagery and theoretical background to provide the possibilities for the analysis of various Electronic Installations. Also Associated Ground Equipment will be handled extensively. Aerials and associated Basic Emission Patterns will also be taught during this course. Hard-copy materials to support the training sessions will be provided.
