

MISSILES AND ARTILLERY SYSTEMS STUDIES

Reference: BIAC-VISRA-001-02

Language: English

Duration: Five days

Preparatory training: Employed as Military Intelligence Analyst or Civilian equivalent.

Graduation Title: Imagery Analyst - Missiles and Artillery Systems

AIM

Provide students sound knowledge in analysis of Missile and Artillery Systems. Upon completion of the course the student should be able to analyze a Missile or Artillery System, including associated Ground Equipment, to the full extent.

COURSE CONTENT

Lectures will contain fundamentals of missile systems and their way of operating. They will include all necessary imagery to provide the possibilities for the analysis of various Static and Mobile Missile Installations (Strategic and Tactical) and Missile and Conventional Artillery Systems. Also Associated Ground Equipment will be taught extensively. Hard-copy materials to support the training sessions will be provided.
