

RECOGNITION TRAINING COURSE AIR

Reference: BIAC-VISRA-001-01R

Language: English

Duration: Five days

Preparatory training: n/a

Graduation Title: Imagery Analyst Aircraft

AIM

Provide students detailed knowledge in Imagery Analysis concerning military and civil aircraft and helicopters.

Once the student has successfully completed the Recognition Training – Air course, he / she should be able to recognize various aircraft and helicopters.

COURSE CONTENT

Close-up ground, low-oblique- and hi-oblique-, as well as satellite imagery will be provided to the trainees during the course. Aircraft / Helicopter reference keys will be provided for future reference.

A generic Air Order of Battle (AOB) will also be taught.

The content of the syllabus may be subject to requirements by the client.
